

I am very disturbed that the FCC and FAA would allow Cellular Telephone use aboard an Aircraft. I am a Flight Attendant for a major airline and with all of the other distractions we have in our environment today adding cellphone use would be one more thing to overcome. The flying public doesn't listen to us now, with a cellphone attached to their ear no one will be listening to our safety announcements and requirements. I hope you take all of this into consideration.

Thank you for your time, and I know you will do the right thing.  
Terri Herbst 15 year Flight Attendant
